EDUCATION

MAE FAH LUANG UNIVERSITY

- School of Applied Digital Technology
- Major in Software Engineering.

Expected Graduation: 2026

SKILLS

Programming Languages

- C#
- TypeScript
- Golang
- Java
- Python

Frontend Frameworks

- React
- React Native
- NextJS
- Vue
- Angular

Backend Frameworks

- .NET
- Express
- Spring Boot
- Nest

Database

- MySQL
- Firebase
- PostgreSQL
- SQLite
- MongoDB

Infrastructure & Tools

- Terraform
- Kubernetes
- Docker

LANGUAGES

- Thai (Native)
- English (Intermediate)

PORTFOLIO

🌐 <https://mabius-portfolio.vercel.app/>

PROFILE

Software Engineering graduate with hands-on internship experience developing production-level web applications using Angular (Frontend) and .NET (Backend/API), covering feature development, bug fixing, and system integration. Strong understanding of API design, database management, and frontend-backend collaboration, with experience leveraging AI tools to improve development efficiency and workflow. Ready to contribute as a full-time Software Engineer.

WORK EXPERIENCE

Full-Stack Developer Intern

Gofive — January 2026 – April 2026

- Worked on real production systems involving frontend and backend feature development
- Collaborated with backend engineers to improve API integration and system consistency
- Designed and optimized database structures to support scalable business requirements
- Participated in feature implementation, debugging, and production issue resolution
- Worked closely with project managers and development teams to deliver production-ready solutions
- Improved development workflow through effective communication across technical and business teams

Frontend Developer (HLLC 2025)

Mae Fah Luang University — May 2025 – August 2025

- Developed and optimized the React Native mobile application, including interactive map, QR code scanning, and coin-hunting features used by 1,000+ students during events.
- Designed the database schema and collaborated with backend developers to ensure the data structure aligned with system requirements.
- Assisted in refining backend logic to improve feature consistency with frontend needs and user requirements.
- Contributed to the e-voucher system and sponsor module by providing database and integration feedback.

Frontend & Backend Contributor (HLLC 2024)

Mae Fah Luang University — May 2024 – August 2024

- Built Admin Dashboard (Vue.js + TypeScript) for user, event, and system management.
- Contributed to reporting system backend for usage analysis and monitoring.
- Assisted in Lamduan Management module design, integrating database with frontend workflows.
